TELEGRAM | ARCHIT. SAMPLE

TELEGRAM

Server handling interaction using **Telegram API**
in 2 ways: **polling** | **webhook**

CLIENT

Telegram client running
on your device

CODE

Server running your code
and talking with the bot using
the generated **API KEY**

TELEGRAM | INTERACTION

GET USER INPUT BY
POLLING

Asking periodically to
Telegram servers for
new messages

GET USER INPUT BY
WEBHOOK

Receiving in real-time
every new message
by Telegram servers

TELEGRAM | RESPONSE SAMPLE

```
{
  "ok": true,
  "result": [
    {
      "update_id": 246250701,
      "message": {

A WORLD OF
LIBRARIES

**LINK BLOCKCHAIN
PLATFORM**

BLOCKCHAIN I INTRODUCTION

/ a distributed database in a decentralized peer network.

Centralized ledger network

Distributed ledger network

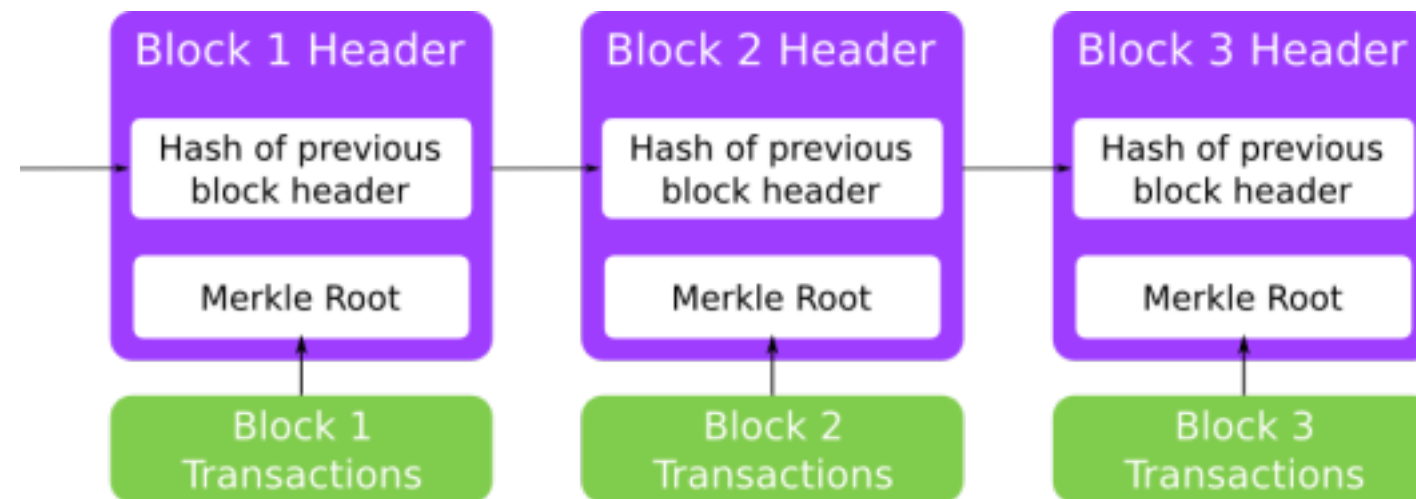

Decentralized ledger network

BLOCKCHAIN I INTRODUCTION

/ This distributed database is partially or totally located
in every node of the network,
the latter automatically inserting new valid entries,
WITHOUT the intervention of a guaranteeing third party.

BLOCKCHAIN I INTRODUCTION

/ in the blockchain
every new entry is a NEW **BLOCK**.

HOW new entries are validated and
accepted in the chain?!

the famous problem of
BYZANTINE GENERALS' PROBLEM

Algorithmically.
CONSENSUS ALGORITHMS

BLOCKCHAIN | BITCOIN DIGITAL CASH

/ Satoshi Nakamoto

/ 2009 Genesis block

/ Algorithm: **Proof Of Work** (POW)

/ new blocks are appended in the chain with a process called **mining** resolving math problems

/ *every node / miner compete for the creation of the next block and get rewarded*

BLOCKCHAIN | ETHEREUM SMART CONTRACTS

/ Vitalik Buterin

/ 2015 **LIVE** version

/ Algorithm: **Proof Of Work** (POW)

Moving to **Proof Of Stake** (POS)

BLOCKCHAIN | LISK BLOCKCHAIN APP PLATFORM IN JS

/ Max Kordek & Oliver Beddows

/ 2016 **LIVE** version

/ Algorithm: **Delegated Proof Of Stake** (DPOS)

/ only 101 elected nodes of the network can add entries on the chain, those nodes are called **Delegates**

/ *101 nodes are elected by the LISK stakeholders*

LINK BLOCKCHAIN PLATFORM

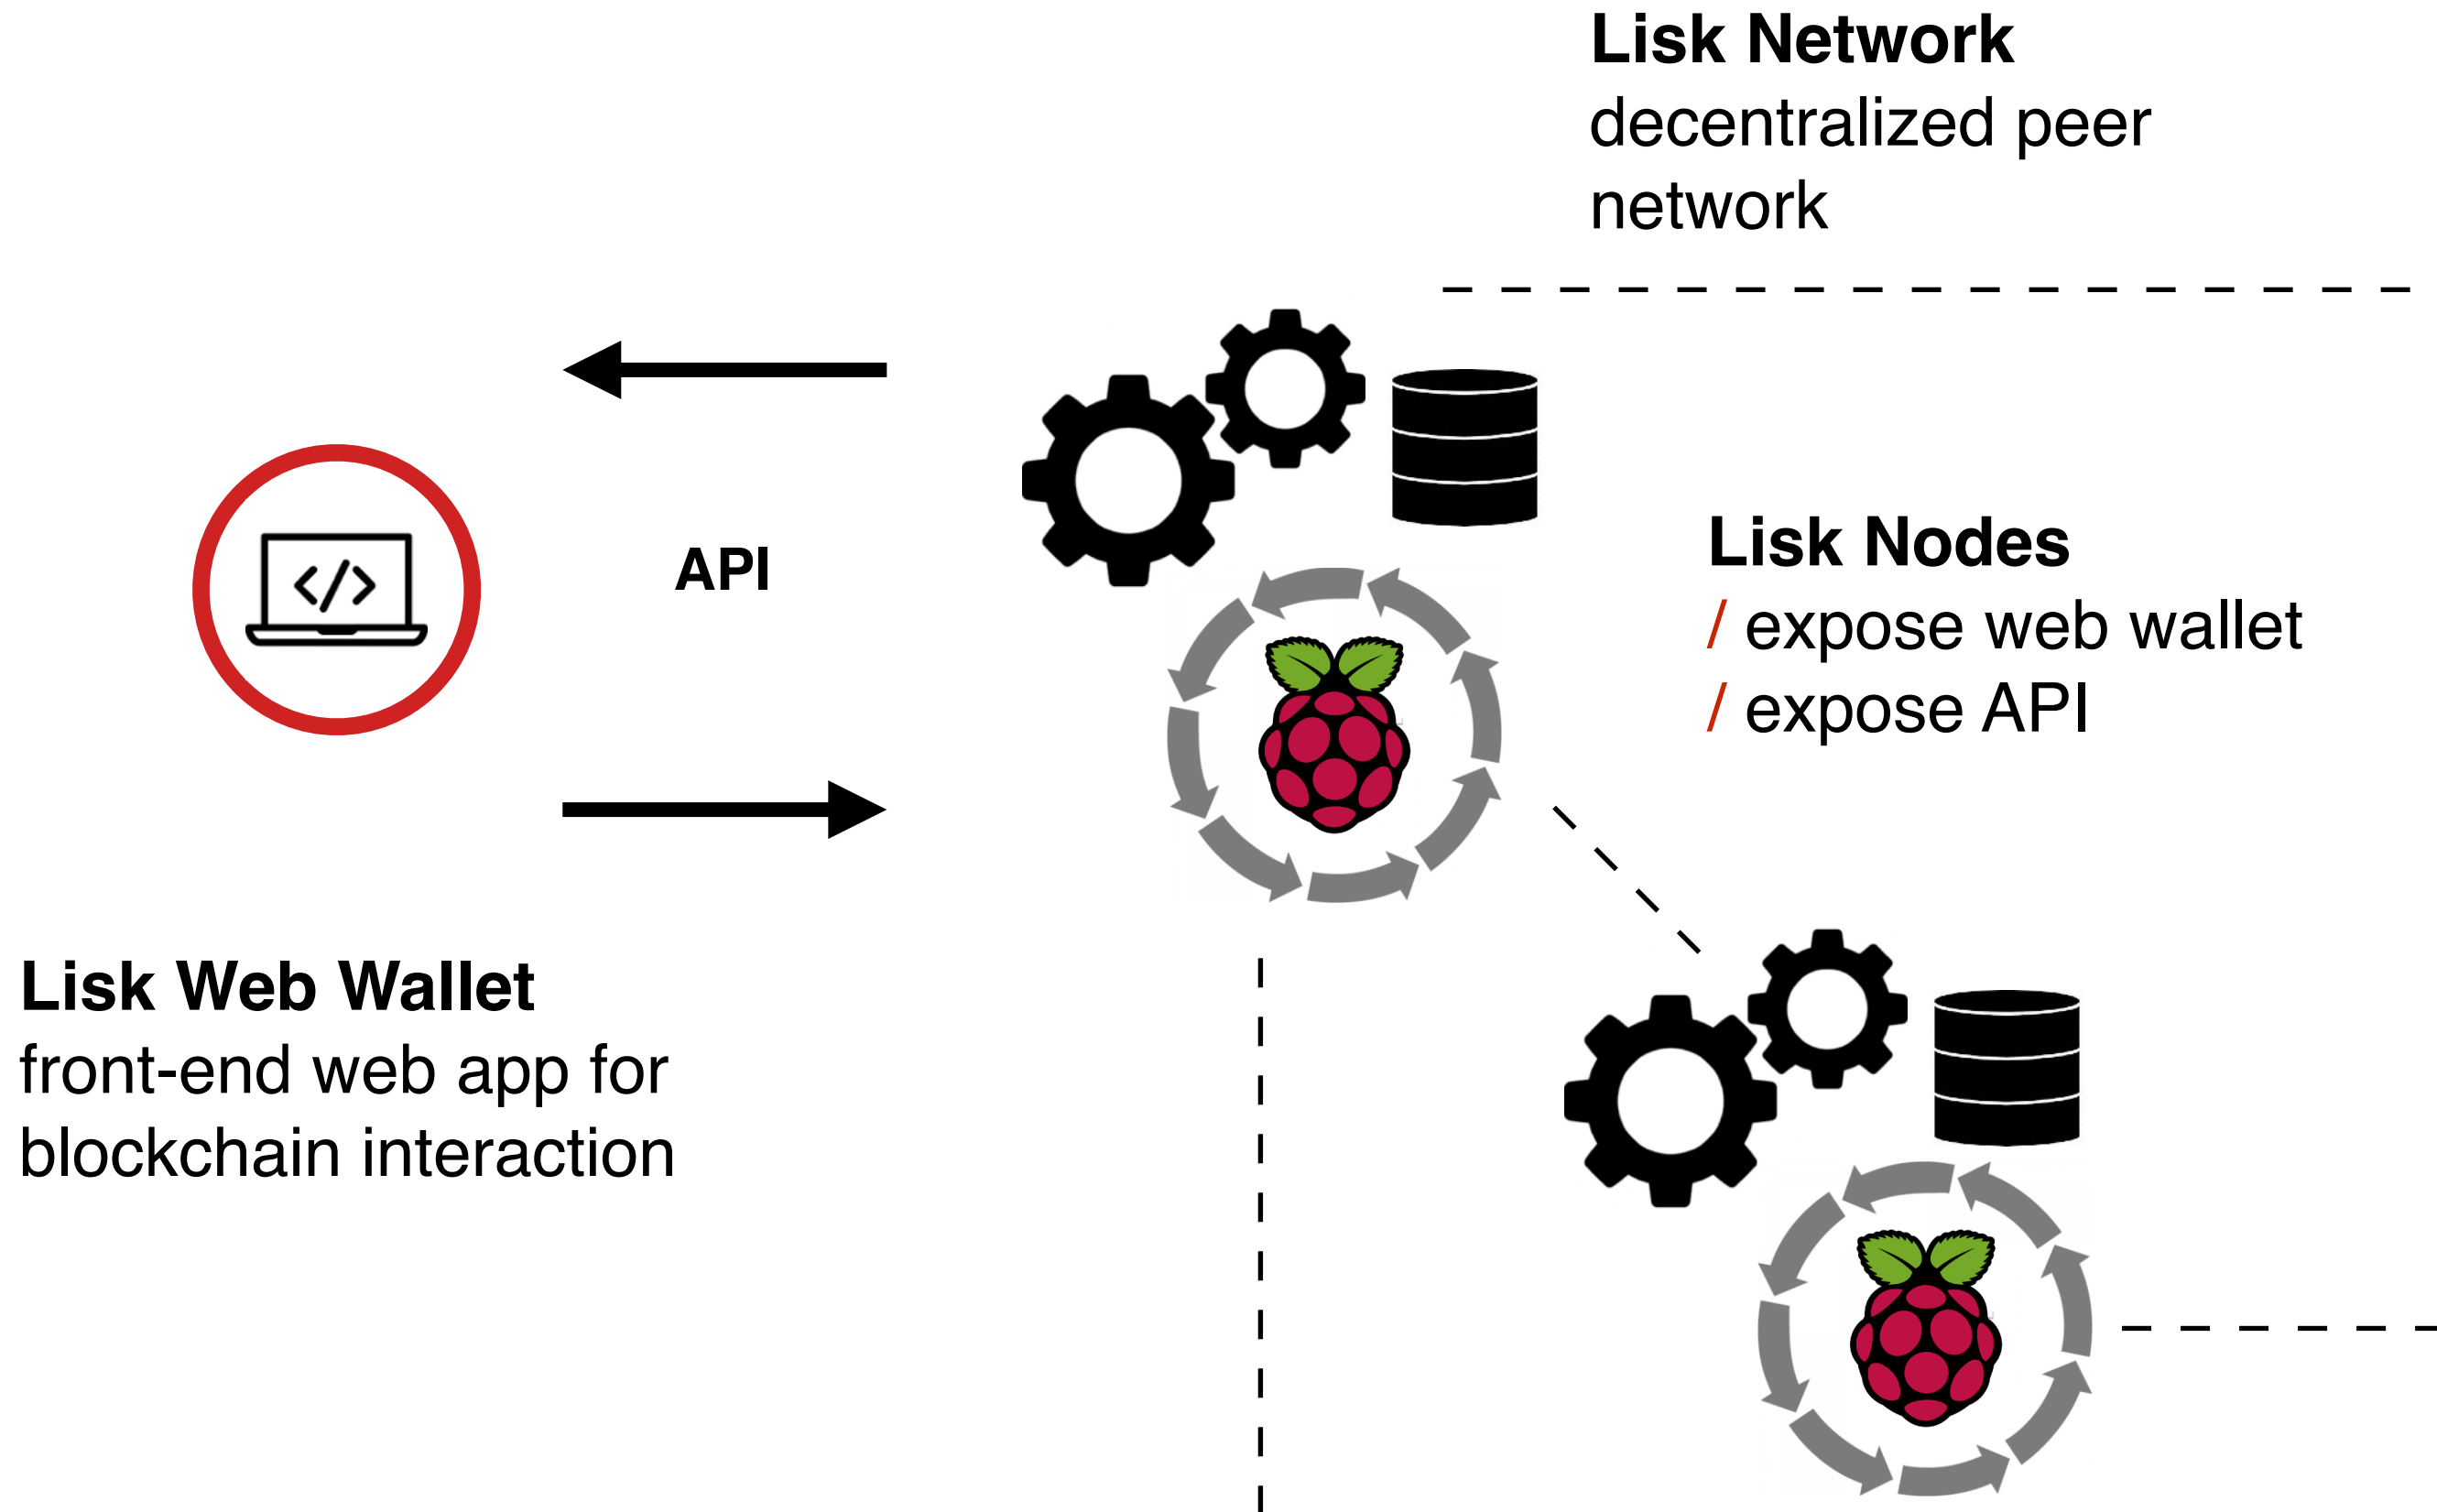

LINK | VISION

SINCE **JS** IT'S THE LINGUA
FRANCA OF PROGRAMMING

CREATE A SIMPLE TO USE
**BLOCKCHAIN
PLATFORM**
FOR DECENTRALIZED
**JAVASCRIPT
APPLICATIONS**

LISK | PLATFORM

**I'M FRONT-END DEVELOPER
USING A LOT OF JS.**

I WANTED TO BE A PART OF IT!

LINK | NODE INSTALL

GUIDELINES AT
